OBJECTIVE

To secure a full-time entry-level opportunity in software development where I can apply my expertise in full-stack web development, relational databases, and applied machine learning to build impactful real-world solutions while continuously growing as a software professional.

SUMMARY

Motivated Information Technology undergraduate with hands-on experience developing scalable web applications, database-driven systems, and data-structure-oriented solutions using modern software engineering practices. Strong foundation in programming, problem-solving, and application design, with a proven ability to independently deliver academic projects from concept to completion.

SKILLS

• C • C++ • JavaScript • HTML • CSS • React.js • MERN Stack • SQL • PostgreSQL • ResNet • Git • GitHub • Data Structures • Algorithms

EDUCATION

B.Tech in Information Technology | CGPA - 7.2 2023 - 2027
College of Engineering, Guindy, Anna University Chennai, Tamil Nadu, India

Higher Secondary | Percent - 96 2021 - 2023
NRI Junior College Guntur, Andhra Pradesh, India

HOBBIES

Traveling, Competitive Programming, Chess, Photography

WORK EXPERIENCE

AI Image Identifier

Developed an **AI-powered image classification system** to distinguish **real** and **AI-generated images** using **ResNet18** and **ResNet50** CNN models, following the **Model-View-Controller (MVC)** architecture for improved modularity and scalability. Implemented **Grad-CAM** heatmap visualization and **EXIF metadata analysis** to enhance prediction transparency and explainability. Designed an interactive **Streamlit** interface integrated with a **TinyLlama-based chatbot** to assist users in understanding model predictions. Utilized **PostgreSQL** for secure user authentication and efficient data storage.

Grocery Management System

Developed a **full-stack grocery inventory management system** using **React.js**, **Node.js**, **Express.js**, and **MongoDB**. Implemented product management, category filtering, search functionality, and RESTful APIs for efficient inventory operations while ensuring a responsive and user-friendly interface.

Campus Lost and Found Management System

Engineered a web-based **Lost and Found Management System** for college campuses using **Spring Boot**, **React.js**, and **PostgreSQL**. Implemented REST APIs for reporting lost/found items, claim verification, and user authentication. Designed an intuitive interface for students and administrators, enabling efficient item tracking, status updates, and secure database management.

LANGUAGES

English, Hindi, Telugu, Tamil
